

# “Energy Commodity Costs – Have We Seen the Bottom?”

## ILLINOIS ENERGY CONSORTIUM (IEC) Workshops

*Historically energy prices, both natural gas and electric power, hit their annual lows during the fall months, ahead of winter heating season. Are the energy markets following this historical pattern and what are the forecasts for 2012, 2013, 2014, and 2015 energy prices?*

*Learn about the fundamental factors (weather, economy, supply and demand) and the technical factors, along with the bearish and bullish indicators. Should your energy team be taking advantage of current future energy prices or should they continue to ride the market prices waiting for the next bottom?*

**Interested??** Then please make plans to attend one of the IEC Energy Cost-Focused Workshops being held throughout the State of Illinois. These workshops are for current or potential IEC members. The IEC is a *not-for-profit*, joint energy purchasing consortium sponsored by the IASB, IASA, and Illinois ASBO. The IEC helps its members *more effectively control their energy costs, usage, and risk over time!*

**All IEC workshop attendees are eligible to win a gas gift card!**

**Winners will be chosen at each location.**

**Register today! Attendance is complimentary, but seating is limited.**

**Beverages and snacks provided.**

Coming to your area! Please choose and register for the session you would like to attend:  
Registration begins at 8:30 am. Workshops will conclude by 12:00 pm.
